DETAILED ACTION

In view of Decision on Appeal submitted by BPAI on 29 May 2007, the claimed subject matters are further distinctly pointed out as patentable features to place the application in the condition for allowance.

Allowable Subject Matter

Claims 1 – 24 are allowed.

The following is an examiner's statement of reasons for allowance:

The above mentioned claims are allowable over prior arts because the CPA (Cited Prior Art) of record fails to teach or render obvious the claimed limitations in combination with the specific added limitations recited in claims 1, 9 and 17 (& associated dependent claims).

The present invention is directed to an authentication method generating a second security context by aggregating the first and the second security context in response to each of independent user authentication actions – according to the specification, the security context represents the user's identity as well as any authorization information associated therewith (SPEC: Page 1 Line 12 – 13). The closest prior art, U.S. Patent 5,774,551 (Wu) and 6,496,937 (Ichihara), fails to anticipate or render obvious the claimed invention because Wu's stacking (i.e., aggregation) of authentication services is not done in response to a second user authentication, but

rather is preexisting and independent of any actual user authentication action (emphasis in original) according to the board decision submitted by BPAI. Thus, the prior arts on record fail to teach or suggest an authentication method comprising the steps of generating a first security context in response to a first user authentication; generating a second security context in response to a second user authentication, wherein said second security context is an aggregate of said first security context and a security context corresponding to an identity in said second user authentication.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
